Errata Brucker/Knust: Complex Scheduling, Springer, 2012

- p.95: The graph in Figure 2.30 (b) is 3-consistent after deleting the solutions $(x_1, x_2, x_3)$ with $x_2 = 3, x_3 = 5$ from the list of all feasible tuples.

- p.111: Rank-based choice: It should read “After sorting all solutions according to their fitness values, each solution $i \in POP$ obtains a rank $r_i$ (i.e. the best solution gets the rank value $|POP|$, the worst the rank value 1).”

- p.114, Figure 2.41: It must be $V^k := V^k \setminus \{i^k_\lambda\}$
